

The Electronics Partner Built for Rack and PDU Manufacturing at Scale

Precision. Control. Integration. Accountability.

Intelligent PDUs and monitored racks carry the highest-value electronics in the white space — metering, switching, sensor, and access-control boards. Sourced offshore, that content adds the lead-time and tariff exposure your data center customers increasingly ask about.

Libra Industries builds the electronics content under one quality system, with one team of experts, and owns the outcome.

METERING & SWITCHING PCBA

IPC Class 3 board assembly for intelligent PDU metering, switching, and monitoring.

SENSORS & ACCESS CONTROL

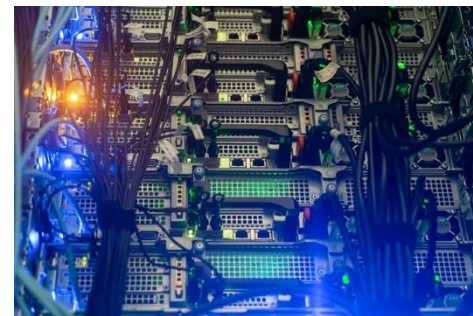

Environmental sensor boards and electronic access-control modules, built with full traceability.

HARNESS & CABINET INTEGRATION

Cable, harness, and box-build so cabinets arrive integration-ready.

TEXAS-BASED, THREE SITES

Dallas and Dayton in the US, with Guaymas for USMCA-qualified volume.

Why This Matters to Your Lead Times

Rack and PDU manufacturers compete on configuration and speed — hundreds of SKUs, shipped fast, as data center fit-outs compress. Offshore boards put your longest lead time inside your highest-value product. Libra is built for that pace.

With Libra, your operations team gains a partner that can:

- **Shorten lead times** — PDU electronics built in Texas, weeks from your plant instead of an ocean away.
- **Start with one SKU** — a low-risk pilot build measured on quality, lead time, and responsiveness.
- **Reduce tariff exposure** with US-built boards and USMCA-qualified volume options.
- **Validate quality at every stage** — IPC Class 3 workmanship and AS9100 / ISO documentation.
- **Scale confidently** from a pilot SKU to full board, harness, and integration support.

Built to Deliver: Rack & PDU

For rack and PDU manufacturers, that means a single, accountable partner for the electronics inside the cabinet — boards, sensors, harness, and integration that ship on your schedule, from your time zone. Scope extends to complete unit assembly and test under your listing.
